Like Mahogany, But Better

Our mahogany grain front doors are made from fiberglass and are made to replicate the look and feel of mahogany wood. Using the finest wood grain dyes, our mahogany grain casts create a product almost indistinguishable from real wood. A mahogany grain front door will contribute to the elegance of your home by adding an affluent touch to its appearance, adding to your homes' market value. Get the luxurious appearance of dark wood without its hassles of maintenance.

A Worthwhile Investment

A mahogany grain front door is a worthwhile investment, with a 25 year warranty against fading and with insulating properties six times better than in a wooden door. They are low maintenance and yet mahogany grain front doors deliver superior security and durability, making them an affordable and rewarding option.

Variety in Design

Our mahogany grain front doors are available in a variety of designs with matching sidelite panels. From traditional to modern designs, we have options to choose from. View our catalogue for the full scope of our inventory.
