Oak Grain - A Classic Appearance Without Compromising Quality

An oak grain front door made out of fiberglass is a beautiful and elegant addition to your home. Besides the timeless appeal of the appearance of wood, a fiberglass doorway is also very practical and cost effective.

Beautiful & Realistic Oak Grain Front Doors

An oak grain front door made out of fiberglass is a beautiful and elegant addition to your home. Besides the timeless appeal of the appearance of wood, a fiberglass doorway is also very practical and cost effective.

A Durable Alternative to Real Oak

A Durable Alternative to Real Oak

Compared to real wooden doors, fiberglass oak grain front doors are more long-lasting, more durable and require less maintenance. Whereas real wood may bend, crack and wear from harsh weather, our oak grain front doors are able to withstand it without damage. This is due to our use of Pine laminated veneer lumber, an incredibly strong material. The panels are also sealed to be watertight, and feature a polyurethane foam core and tongue in groove joints for additional strength.

View our catalogue for additional information on styles and sizes, and invest in a resilient and attractive entry way for your home.
